

15-min cities : Bringing more proximity in cities

TUTORIAL : 4 WAYS TO USE OUR KNOWLEDGE HUB

Platform description

BRIDGING THE GAP BETWEEN RESEARCH AND PRACTICE

Credits : Maxime Hachette

This community, hosted by the french platform Expertises Territoires, showcases the latest research on 15 minute cities. It also showcases practitioners' experiences in implementing the concept. It is an initiative of the ACUTE (Accessibility and Connectivity for Urban Transformation in Europe) project, whose aim is to create a knowledge hub for exchange in the field of urban accessibility and connectivity. Our purpose is to overcome the fragmentation of knowledge, experience, skills and outcomes. ACUTE addresses the challenges of sustainable urban passenger mobility, freight transport, connectivity and accessibility as an integral and essential part of sustainable urban development. ACUTE aims to create a space for stakeholders to exchange and co-create. The community provides an inclusive environment for urban actors from different backgrounds (researchers, practitioners, public administrators, entrepreneurs, social innovators, etc.) to discuss current issues and priorities and to identify the most pressing urban challenges of today and tomorrow. The ACUTE project is a multi-stakeholder project involving partners from five European countries, coordinated by BOKU - University of Natural Resources and Applied Life Sciences, Institute of Production and Logistics, Vienna (AT). The partners are Université Gustave Eiffel (FR), Cerema (FR), Latvia University of Life Sciences and Technologies, University of Latvia, RISE - Research Institutes of Sweden, University of Westminster (UK), Malmö University (SWE), K2 (SWE), Power Circle (SWE), University of Innsbruck (AT) and Graz Energy Agency (AT).
